OTHER VIEW POINTS It is evident from the reports now flied with the health department that the plante of influenza is waning in the plante. This does not mean that the place of influence is waning in this city. This does not mean that we can yet afford to take undue risks, but it does mean that healthful conditions are returing and that the care and preparation displayed by indee who have the guardianship of public health flave at least kept the city from the worst effects of this deadly visitor.
